

The NAB is currently trying to stop SIRIUS and XM from broadcasting local weather, traffice and \"Other Services.\"

1. What are \"Other Services?\"

2. Since the traffic and weather is being sent to all the USA, it\'s not targeting current localities.

3. SIRIUS and XM are providing servies not currently avaiable in those areas, if an FM or AM Station were providing the exact same service, there may be reason for concern, however they are not providing weather and traffic continously like XM or SIRIUS does.
